

# Resilient Power Project Technical Assistance Fund

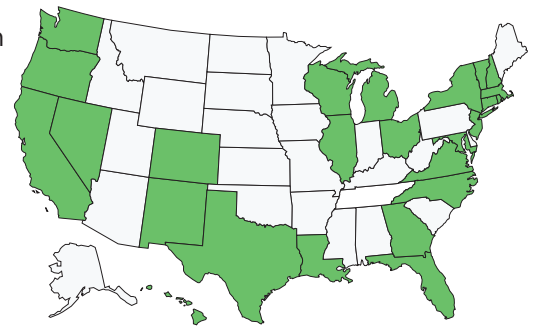

Clean Energy Group's Resilient Power Project (RPP) has granted over \$1 million from its Technical Assistance Fund (TAF) to support community-serving entities seeking to install solar PV and battery storage systems. These small grants have made it possible for nonprofit advocacy and housing organizations to build internal capacity and explore how solar+storage can bring both health and economic benefits to their communities. You can help us reach our next \$1 million goal: support the TAF by donating [here](#).

**93 Projects Supported**  
**30 Completed to Date**

The TAF has advanced the exploration and implementation of **93** community-serving resilient solar+storage efforts across **22** states, DC, and Puerto Rico. To date, **30** installations have been completed.

**24 States and Territories**

**\$1,000,000**  
**in Grant Awards**

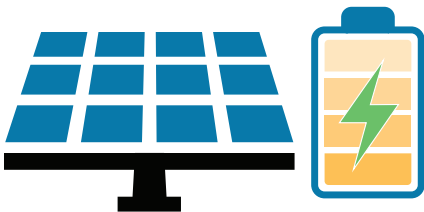

**Clean Energy Group** has awarded more than **\$1 million** in technical assistance and knowledge-building grants to **86** affordable housing and local nonprofit organizations working to advance resilient solar+storage in their communities.

**86 Local Nonprofits**

**25% of Grants have Resulted in Installations**

**Clean Energy Group** is committed to advancing energy equity by supporting projects in underserved communities, with at least **50 percent** of TAF grants awarded to BIPOC-led organizations.

**Supporting the Work of Diverse and Inclusive Community Organizations**
